

The ABCs of AI

A practical guide of navigating AI in daily living

Curious? Let's find out.

Where do I even begin?

Auto correct, Spotify, Youtube, Uber Eats, Netflix, Google Maps... etc.

Raise your hand if you've used AI in the last 24 hours.

Now leave it up if you didn't realize you were.

01

To AI or not to AI

For your children, parents, even
your pets!

Is there an AI for your children?

Already fluent

Children use AI in games, YouTube, reading apps and homework tools, often without knowing it.

Personalised learning

Apps like Khanmigo adapt reading levels, give instant feedback, and flag students who need support.

The real risk

Not that AI is too smart, but it's passive use. Build critical thinking alongside AI, not instead of it.

Main Question

"What's one AI tool you use that your parents don't know about?"

AI Beyond The Office

- **AI you already use without knowing:** recommendation engines (Netflix, YouTube, Spotify), autocorrect, Google Maps traffic predictions, M-Pesa fraud detection
- **AI for personal productivity:** planning your week, drafting messages, researching a topic, translating languages
- **AI for health questions:** how to use AI to understand a diagnosis, prepare questions for a doctor's visit, or research medication, and why you should always verify with a professional
Meta AI
- **AI for learning and self-improvement:** using Khanmigo or ChatGPT to learn a new skill, prepare for an interview, or understand a legal or financial document
- **AI for creativity:** writing, generating ideas, designing images, making music
Canva, Gemini, Grammarly
- **AI for parents:** helping children with homework responsibly, monitoring AI use, and age appropriate conversations about AI

Careers of the future

New roles

- AI trainers
- Prompt engineers
- AI policy advisors
- Data curators & Researchers
- AI literacy facilitators

Timeless Skills

- Judgement & critical thinking
- Storytelling & Communication
- Empathy & cultural context
- Domain expertise
- Asking great questions

“AI won't replace humans, but
humans with AI will replace
humans without AI”

—Someone Smart

Safety in AI

- AI can be wrong, confidently. Learn to spot hallucinations: AI making up facts, names, or sources that do not exist
- **Data and privacy:** understand what happens to what you type into AI tools. Free tools may use your prompts to improve their models
- **Deepfakes and AI-generated content:** how to recognise manipulated images, audio, and video, and why this matters in an election year
- **AI and your children:** age-appropriate use, risks of over-reliance, and academic integrity in schools
- **Scams powered by AI:** voice cloning, fake customer service bots, phishing messages written by AI, and how to protect yourself

A simple rule of thumb: if you would not shout it in a public space, do not type it into a free AI tool.

AI does not replace the doctor, the lawyer, or the financial advisor but instead it helps you have a better conversation with them

02

Introduction to prompting

Prompt like a pro with 20 years
experience 😊

Tips for a good Prompt

Specificity

Specify the audience, format, length, and angle

Context

who you are, why you're asking matters

Assign a role

Tell the AI who to be

Output

Describe the output format

Format

Break complex tasks into steps

Constraints

Use negative constraints

Practically Speaking

A quick structure that works well for most prompts:

Role + Context + Task + Format + Constraints

"You are an experienced facilitator [role]. I'm running a 45-minute workshop with 30 community health workers in Nairobi who have low digital literacy [context].

Write an icebreaker activity that introduces AI concepts without any technical language [task], in a step-by-step numbered format [format], and keep it under 5 minutes to run [constraint]."

03

AI in Practice

Time to buddy up!

How we can help each other

What learning looks like in 2026: sideways, peer to peer, across generations.

Prompt A

Plan a one-day family outing in Nairobi for under 3,000 shillings.

Prompt B

Write a funny wedding toast for a friend who is always late.

Prompt C

Explain climate change to a 10-year-old in three sentences.

Prompt D

I have eggs, tomatoes, onions, and chapati. What can I cook?
